

Exporting Individual Point Files into BEAT 2006.

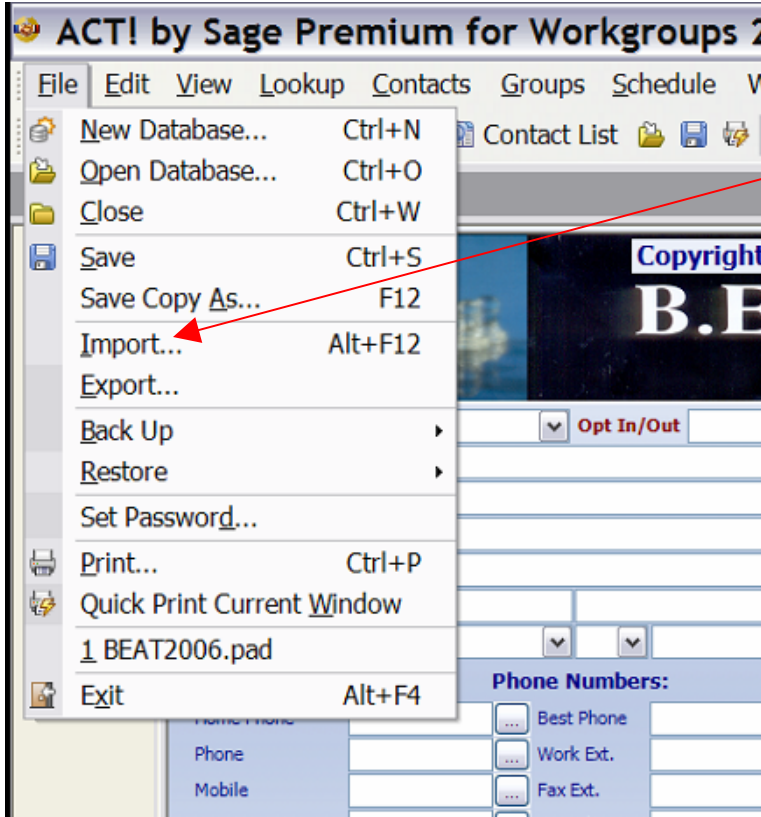

In Point, select “File > Export to > Other App (using export template)” as seen below:

You then be notified that the export is complete. Click OK:

Now, In ACT!, select “File > Import” as seen below:

This will start the Import Wizard. Click Next:

You will need to make the following changes on the second panel of the wizard. Choose Text Delimited for the type of file, and the location of the text file you just created in the previous step in Point:

Import Wizard (2 of 3)

Specify Source

Note: If you do not see the file type that you want, you may need to convert your existing file to a delimited text file. ACT! 3.x - 6.x databases must be converted in order to import.

What type of file do you want to import?
Text Delimited

File name and location:
C:\BEAT5.0.TXT Browse...

Enter user log on information

User Name

Password

< Back Next > Finish Cancel

Then, click Next.

Now, simply click Next on the panel 3. It should already be set to “Contact Records”

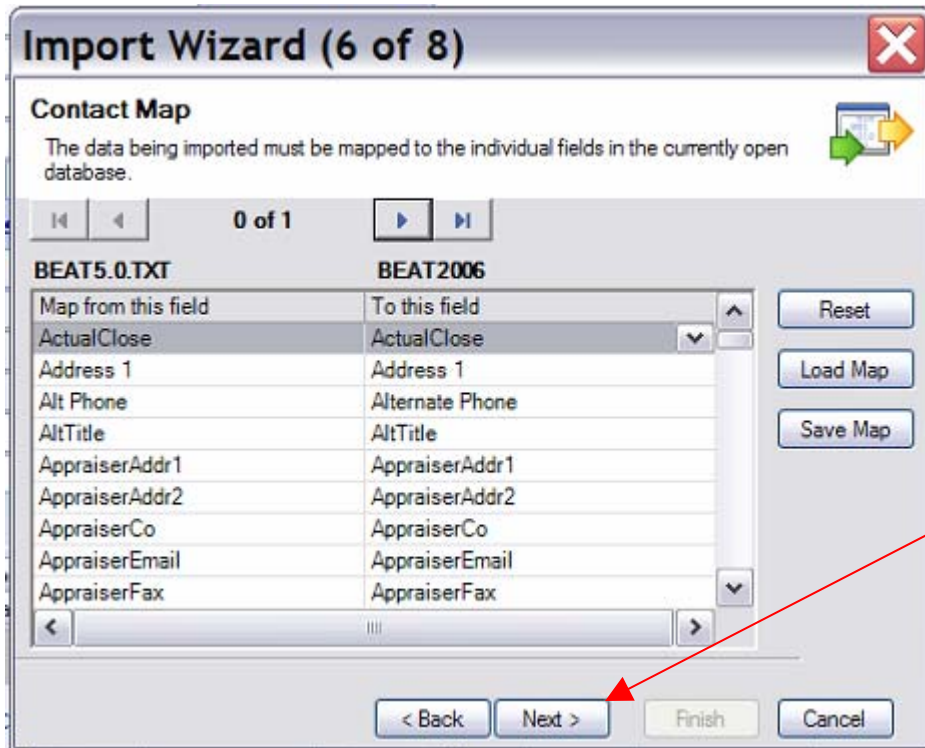

On page 4 of the wizard, please select “Tab” under field separator, and click Next:

On page 5, please click Next:

On Panel 6, please click Next:

On page 7, click Next.

You may now complete the wizard by clicking Finish
