

Bring the communications  
power of big business within reach

**Some of Switchvox's many benefits:**

- Receive calls anywhere using advanced call routing capabilities
- Cost Control and savings with VoIP and open-standards based technology
- Simple and seamless configuration from anywhere through a point-and-click on-line interface
- Create a cohesive image by connecting branch offices and remote workers
- Call center functionality to increase the effectiveness of your employee
- Stay connected with voice mail delivered to your email inbox
- Unlimited extensions and scalable architecture to accommodate growth and change
- Peering capabilities to extend your enterprise geographically
- Create unlimited, powerful IVRs without any scripting, using a graphical editor
- Integrate with your databases and applications through an XML interface to simplify operations
- Supports IP telephony, T1/E1 lines, and regular POTS lines to allow maximum flexibility
